A blend of online knowledge delivery
and onsite competency training.

cogentskills.com

Our training is based on a set of recognised **industry standards** that underpin a wide variety of job roles.

These standards include:

- Science Manufacturing Process Operative
- Laboratory Technician
- Process Industry Manufacturing Technician
- Process Leader
- Science Industry Maintenance Technician
- Battery Manufacturing Technician

Each standard applies to multiple roles across the sector, providing a flexible foundation for workforce development. We tailor our content to align with both sector-wide requirements and the unique needs of each employer, delivering customised training that's relevant and impactful for your business.

**Upskill existing staff
or train new recruits**
