OUR SERVICES

## Full Programme Delivery & Managed Services

### Business Case
Fundable business cases built on a track record of securing £70M in NHSE DDCP funding.

### Project Review
**Independent assurance on in-flight programmes, surfacing risks before they escalate.**

### Project Delivery
Full delivery leadership from mobilisation to go-live across ICE, LIMS, POCT and EPR.

### Technical / Engineering
**Specialist oversight across analysers, middleware, interfaces and POC connectivity.**

### Testing
A full managed testing service leading integration, UAT and clinical safety testing.

### PMO
**Tracking, reporting and governance that keeps every project on track.**

### Procurement
Supplier selection through to tender support for major equipment and system buys.

### IT Service Delivery
**Managing transition and service readiness so new systems perform from day one.**

OUR TRACK RECORD

## Recent Projects

ICE

### Enterprise ICE
Defined the UK's first Enterprise-level ICE Order Comms programme across Pathology and Radiology, consolidating 7 contracts into one and leading full system integration testing, UAT and GP roll-out.

LIMS

### Full LIMS Network Deployment
Delivered Clinisys Winpath Enterprise deployments across 5 Trusts — greenfield builds and upgrades — with full analyser integration testing, cutover planning and service readiness.

FUNDING

### NHSE DDCP Business Cases
**Produced NHSE DDCP funding cases over 5 years, including the FY26–FY30 request for two networks, securing £70M with benefits realisation built in from the outset.**

OPERATING MODEL

### Network Portfolio Operating Model
**Built a full PMO with delivery tracking and project health reporting as Head of Projects, driving cost optimisation and financing models across the network portfolio.**

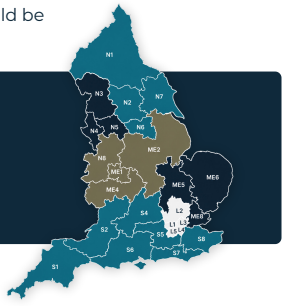

SECTOR KNOWLEDGE

## Delivering on the Carter Vision

We are already helping 5+ Pathology Networks to deliver on Lord Carter of Coles' vision: to organise at scale, standardise what should be standard, and measure performance in ways that support improvement.

"Clearer accountability, consistent measurement, interoperable digital systems, stronger workforce deployment and more transparent funding and assurance."

**— Lord Carter of Coles**
