

Your Trusted Partner in

Cyber Security, Digital Forensics & Investigations

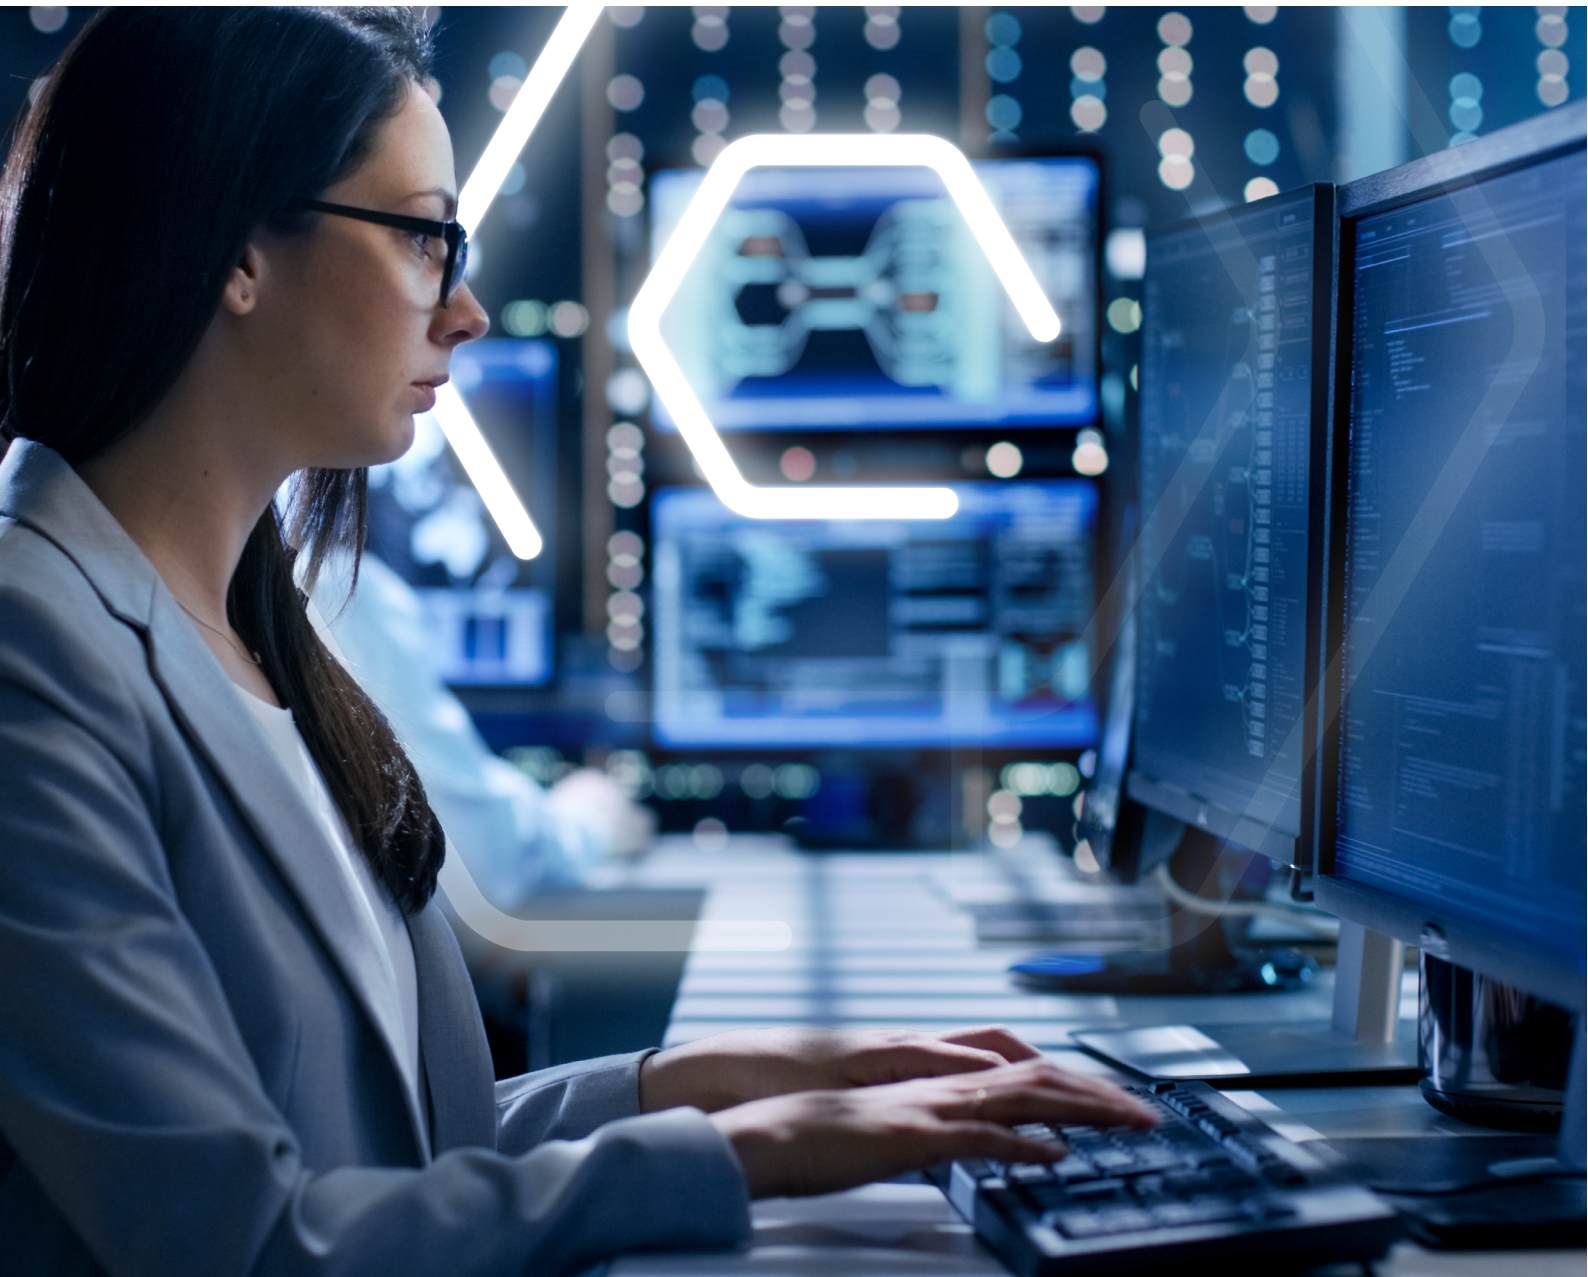

End-to-End Digital Forensics, Cyber Security & Investigation Solutions

At IntaForensics, we offer an extensive range of specialist services, empowering organisations to manage cyber threats, secure digital assets, and investigate complex cases.

Our highly skilled digital forensic experts, cyber security specialists, and digital investigators deliver trusted, defensible, and innovative solutions to meet the needs of law enforcement,

legal professionals, government agencies, businesses, and private clients.

Whether you require cyber security services, digital forensic investigations, cell site analysis, or e-Discovery support, IntaForensics provides end-to-end expertise backed by industry accreditations and years of experience.

Our Core Services

Cyber Security

Protect your organisation against evolving cyber threats with our tailored security services:

- » **Cyber Investigations** – Expert analysis to uncover misuse, tampering, and unauthorised activity.
- » **Penetration Testing** – In-depth testing for networks, applications, APIs, Wi-Fi, and more.
- » **Managed Detection & Response (MDR)** – 24/7 monitoring and threat mitigation.
- » **Cyber Essentials & Cyber Essentials Plus** – Achieve essential compliance with expert support.
- » **Incident Response** – Rapid containment and remediation support in the event of a cyber breach.
- » **Cyber Security Audits** – Comprehensive assessments to identify risks, ensure compliance, and enhance cyber resilience.

Digital Forensics

Leading forensic expertise for criminal, civil, and corporate cases:

- » **Device Data Analysis** – Extract and analyse data from mobile phones, computers, and storage devices.
- » **Cloud, Communication & Social Media Analysis** – Investigate emails, messaging apps, cloud data, and online activity.
- » **Forensic Video Analysis** – Authenticate and enhance CCTV, dashcam, and mobile footage.
- » **Artificial Intelligence & Deep Fake Analysis** – Detect manipulated media and AI-generated content.
- » **Expert Witness Services** – Deliver court-ready reports and expert witness testimony.

Cell Site Analysis

Using cell site data to map movements and confirm device locations:

- » **Geo-location Mapping** – Identify where calls, texts, and data sessions were made.
- » **Signal Strength RF Surveys** – Assess mobile network coverage for accurate positioning.
- » **Expert Witness Reports** – Reliable, court-admissible cell site analysis and expert witness testimony, accredited to ISO/IEC 17025:2017.

e-Discovery

Simplify complex litigation and regulatory processes with advanced e-discovery solutions:

- » **RelativityOne Platform** – Secure cloud-based review and analysis.
- » **Data Subject Access Requests (DSARs)** – Efficiently handle GDPR compliance requests.
- » **Data Processing & Filtering** – Cull irrelevant data for streamlined reviews.
- » **Public Inquiries & Corporate Investigations** – Specialist support for high-profile cases.

Lima Forensic Case Management®

- » **Industry Leading Forensic Case Management** – Designed by forensic practitioners, for forensic practitioners.
- » **Optimised Forensic Workflows** – Ensure efficient evidence management, strong chain of custody, and compliance with ISO/IEC 17025:2017.

Consultancy & Training

Enhancing organisation's cyber resilience and forensic capabilities:

- » **Cyber Awareness & First Responder Training** – Improve team readiness for cyber threats.
- » **ISO Compliance Support** – Expert guidance on ISO/IEC 17025:2017 and ISO/IEC 27001:2022 standards.
- » **Tailored Workshops & Incident Response Planning** – Prepare your organisation for evolving risks.
