

PROTECTING YOUR BUSINESS FROM EVOLVING **CYBER THREATS**

Cyber threats are growing in complexity, targeting businesses of all sizes with ransomware, phishing, data breaches, and system vulnerabilities. Without a robust security strategy, organisations risk financial loss, reputational damage, and operational disruption.

At IntaForensics, we provide a specialised suite of cyber security services designed to protect, detect, and respond to cyber threats. Whether you need proactive security assessments and system testing or reactive incident response, our experts deliver tailored solutions to keep your organisation secure. As a CREST and ISO/IEC 27001:2022 certified company, you couldn't be in better hands.

Our Cyber Security Services

Our expertise spans multiple areas of cyber security, offering businesses end-to-end protection against digital threats.

Security Assessments & Audits

- » **Cyber Security Audit** – Assess your security posture and identify weaknesses in policies, networks, and access controls.
- » **Cloud Assessments** – Ensure your Microsoft 365, AWS, Azure, and Google Cloud environments are secure and compliant.
- » **Cyber Essentials** – Address common threats and certify against Cyber Essentials standards.
- » **Policy Review & Creation** – Development of ISO/IEC 27001:2022-compliant incident response policies tailored to your business.

Threat Detection & Prevention

- » **Managed Detection and Response** – Around the clock platform monitoring of your assets to prevent an incident.
- » **Penetration Testing** – Simulate real-world attacks and identify potential roots of compromise.
- » **Phishing Assessments** – Simulated phishing campaigns to test employee awareness and improve cyber security training.
- » **Vulnerability Scanning** – Detect exploitable weaknesses in external-facing systems.
- » **Dark Web Monitoring** – Proactively identify leaked credentials or sensitive business data on underground marketplaces.

Threat Response & Investigation

- » **Breach & Incident Response Investigations** – Respond to an incident and reach containment with IntaForensics technical support.
- » **Retained Incident Response** – Proactively prepare for an incident and have technical support on call.
- » **Cyber Investigations** – Forensic analysis of suspicious staff activity, data misuse, and unauthorised system access.
- » **Malware & Malicious Document Analysis** – Investigate suspicious files and detect hidden malware threats.

Why Cyber Security Matters

Cyber criminals continuously adapt their attack methods, targeting businesses through exploitable vulnerabilities, human error, and advanced cyber tactics.

A strong security strategy helps organisations:

- » Reduce risk exposure to cyber threats.
- » Achieve regulatory compliance with frameworks like ISO/IEC 27001:2022, NCSC, NIST, and Cyber Essentials.
- » Protect business continuity by mitigating potential disruptions.
- » Safeguard customer trust and sensitive data.

Whether you're reacting to a cyber incident or proactively strengthening defences, our security specialists help you stay ahead of evolving threats.

"IntaForensics has consistently provided us with exceptional cyber security support and guidance. The team is highly responsive and has always gone the extra mile to ensure our needs are met. Their knowledge and professionalism give us the confidence to navigate complex security challenges."

Large Retail Company

"IntaForensics are a trusted cyber security partner. Their knowledge, pragmatism and quality of communications are excellent and always help to make the re-certification process as straightforward as possible."

Informed Solutions

Why Choose IntaForensics?

INDUSTRY-LEADING EXPERTS

Specialists in cyber security, digital forensics, and regulatory compliance.
