

Luscii

an OMRON Healthcare Service

Create more space for care with Luscii

Empower patients as active participants in their own remote monitoring journey and help future-proof the NHS by leveraging a continuum of virtual care beyond virtual wards. At Luscii, we support you to create more space for care, giving you time to focus on the patients who need it most.

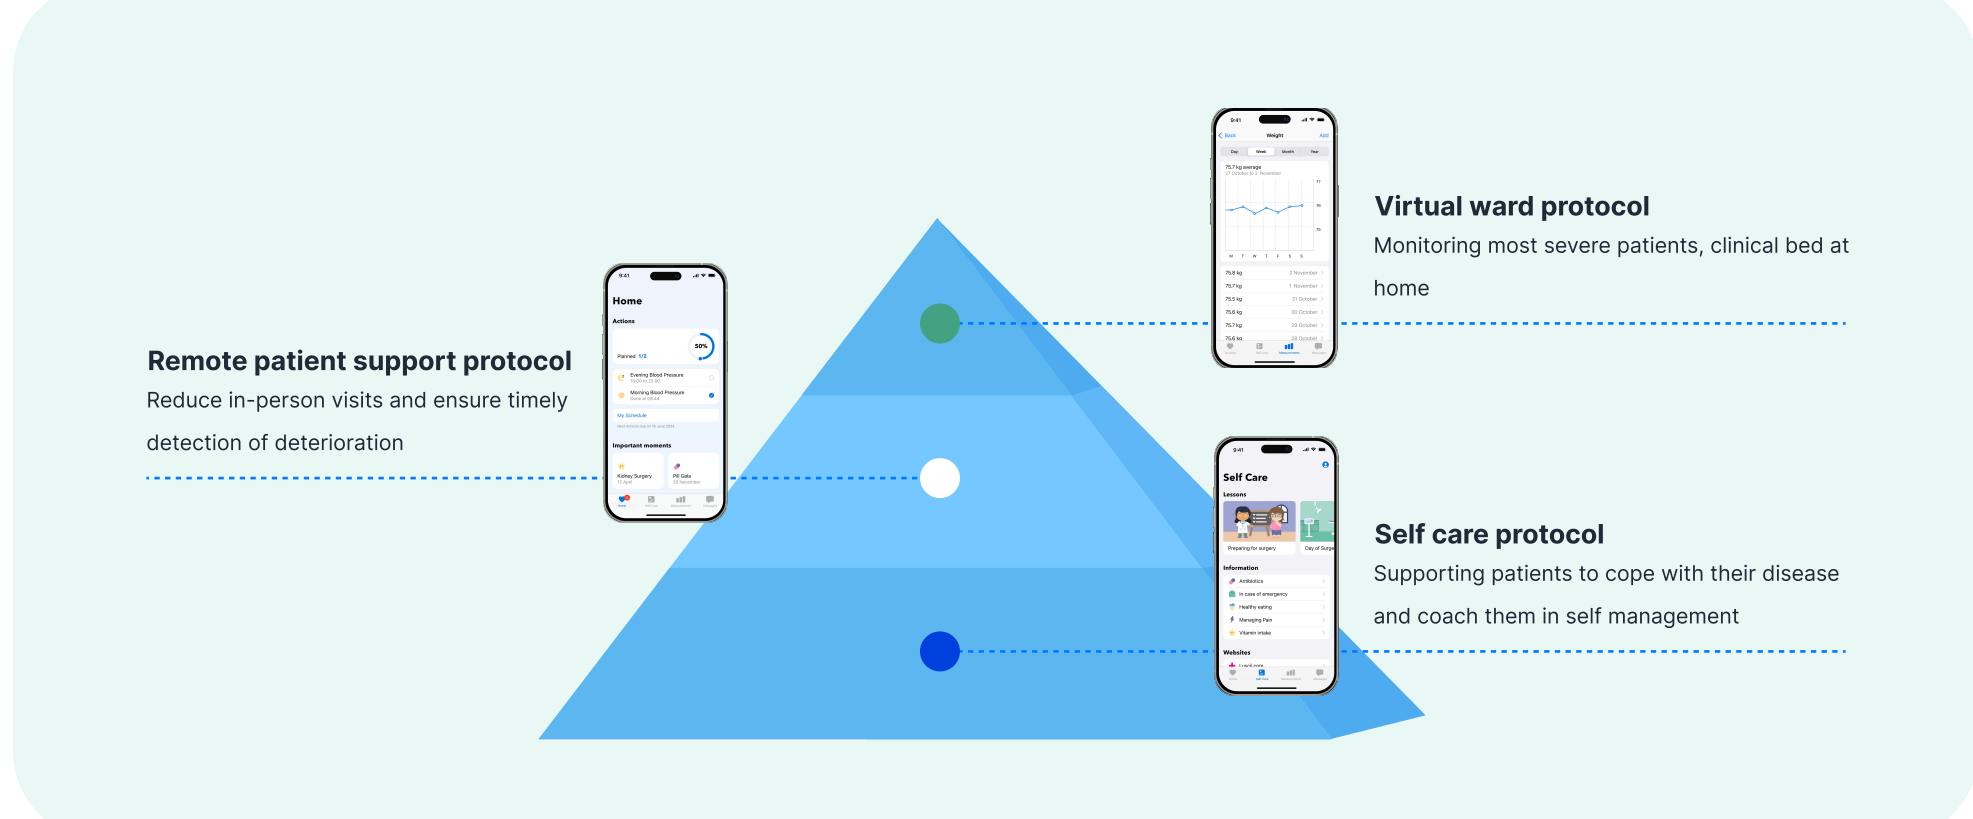

Luscii: Timely, quality patient care for the long term

Luscii is your trusted, long-lasting partner for remote patient monitoring. We leverage the continuum of digital care beyond virtual wards, supporting the realisation of clinical capacity potential to create a future-fit NHS. With 350 implementations and 150+ care pathways, backed by 30+ clinical studies, Luscii enables providers and patients to manage chronic conditions at home. We increase clinical capacity at every opportunity — strengthening the NHS' capability to provide high-quality care for years to come.

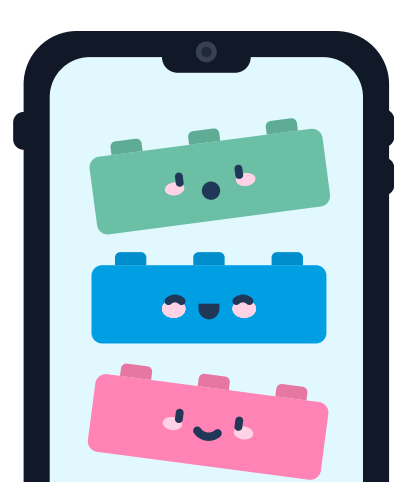

As an OMRON Healthcare Service, we combine our collective knowledge of long-term condition management to offer the most comprehensive, system-wide solution, with a roadmap of devices that bring value to your patients and health systems.

Bridging the care gap

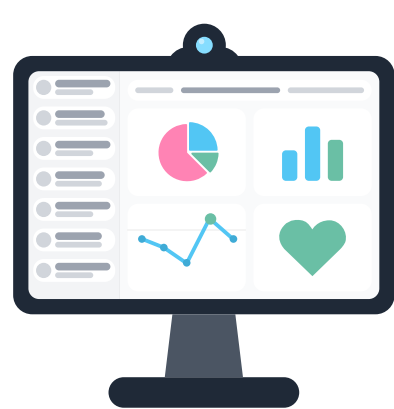

Trusted partner

Ensure your remote monitoring strategy is fit for your purpose. Our partnership is built on active listening and continuous learning, so every strategy is custom-designed to drive your long-term success. By bringing your team and ours together, we tackle the most significant challenges with dynamic solutions that deliver lasting impact.

Flexible platform

Easily create and customise your own programmes, or choose from our library of 150+ pre-existing ones, developed in partnership with NHS clinical teams and aligned with NHS guidelines for prompt implementation. Our platform stands out for its user-friendly design, fostering patient compliance and provider confidence.

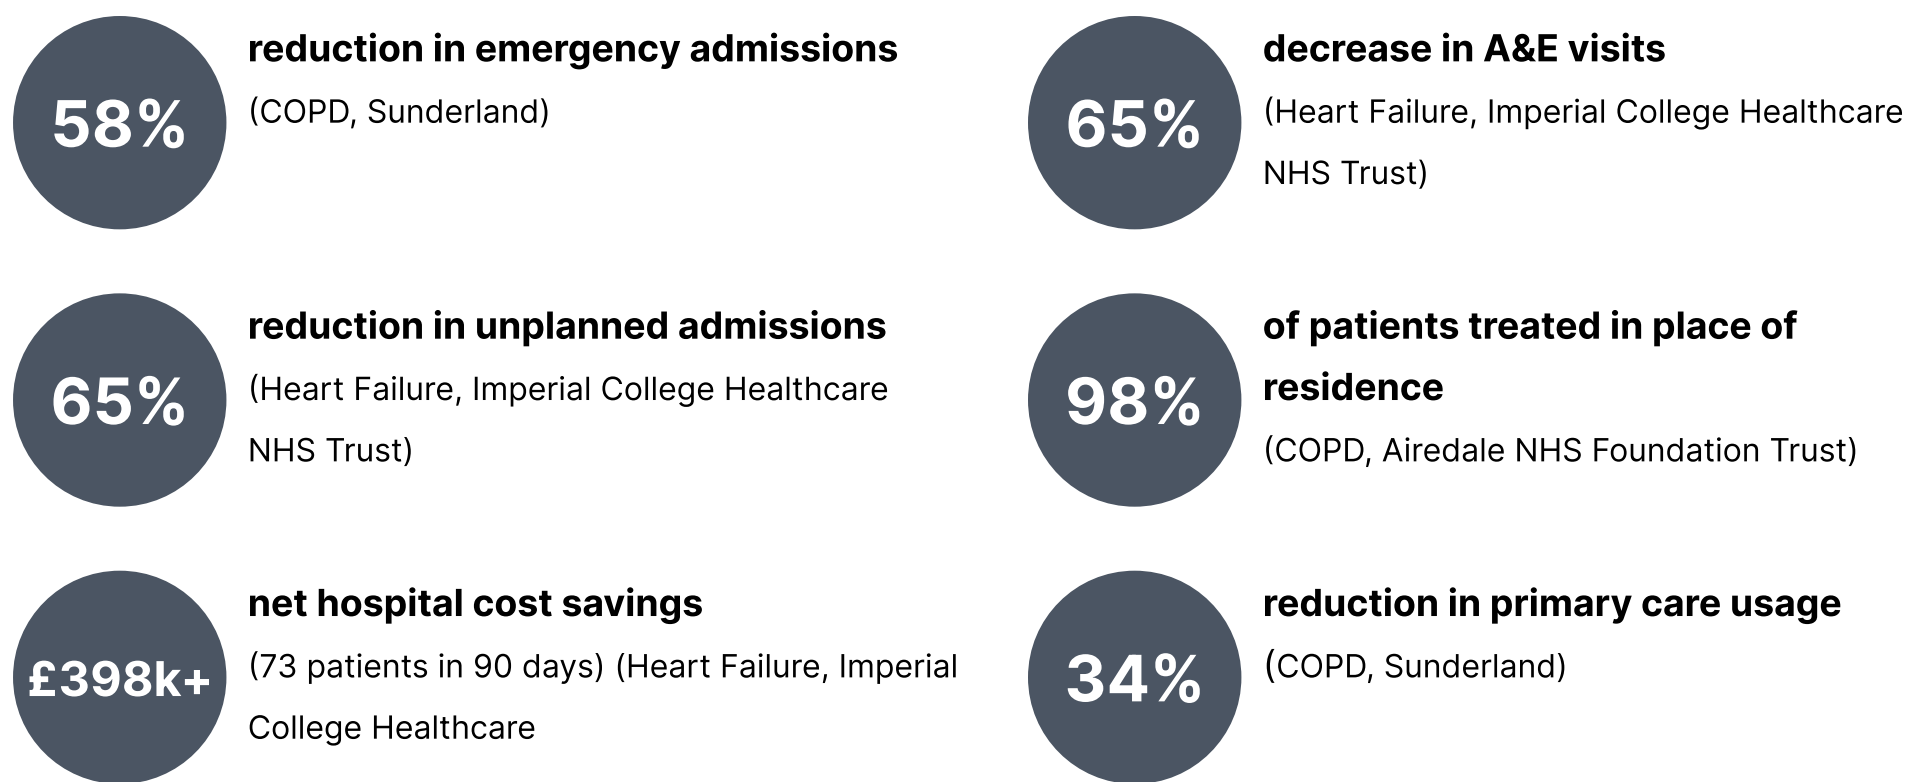

Future-fit

Ensure you're set up for success with a future-fit partner. As an Omron Healthcare Service, we're committed to sustainable, scalable long-term digital health transformation. Our business model is designed to support your scalability for the future of healthcare without stretching your investment. We are the trusted, long-lasting partner you can rely on.

Luscii's NHS impact so far

We help you reduce pressure on your services, while giving you the confidence to provide remote, high-quality care for patients with long-term conditions from wherever they need it.

Explore the Luscii Library

At Luscii, we help clinicians embrace ongoing healthcare changes and align with the NHS' goals for virtual wards, home hospitals, and remote patient monitoring for long-term conditions. We offer more than 150 existing programmes for various long-term conditions, including COPD, Asthma, and Heart Failure.

We also assist clinicians in creating customised programmes via our easy-to-use, scalable platform. Our commitment to interoperability ensures effortless integration with your core systems, streamlining operations and enhancing user experience.

Co-creating a bespoke remote monitoring strategy for long-term success
