

Pride.Precision.Performance.

Place instruments safely during surgery by using Kit-Mat[®], the reusable, autoclavable and latex free Magnetic Mat from Bolton Surgical

- Low magnetic flux magnets minimise risk of magnetic interference
- Encapsulated ceramic magnets ensure secure retention of magnetic instruments
- High friction surface and raised pads helps to ensure secure retention of non-magnetic instruments
- Provides a convenient, large surface area
- Dissipates weight and allows for multiple instrument segregation, handling and transfer between theatre staff
- Easy to clean silicone material is resistant to all commonly used cleaning fluids
- Withstands numerous reprocessing and sterilisation cycles in accordance with HTM01-01
- Non-reflective surface
- Fully Autoclavable (see IFU)
- Available in two sizes
- Latex free

DESCRIPTION	CODE
