MedeAnalytics - Healthcare Analytics Specialists

MedeAnalytics' scalable solutions deliver the action-ready insights organisations need to achieve success for population health, financial management, operations, value-based care, and strategic planning.

Helping clients realise value almost immediately is just one of the many reasons why MedeAnalytics is the leading healthcare-only analytics provider. Every day, MedeAnalytics empowers Integrated Care System organisations to achieve better outcomes by unlocking the potential of their data.

What MedeAnalytics offers

Unmatched ability to integrate data from a multitude of data sources, including linking disparate systems for deeper insights.

Healthcare specialism—Digital healthcare analytics specialists since 1994, MedeAnalytics is built by healthcare people, for healthcare people.

Actionable insights—MedeAnalytics' single system is perfect for ICSs, which need to aggregate large amounts of data from different sources to analyse population health, create evidence-based strategies, design interventions, and plan resources.

A single system with NHS Digital approved data security methods enables the right people to see and understand patient and population level data.

Client testimonial

"What MedeAnalytics ultimately did for us was allow us that daily hospital data which fed our daily huddle and allowed us to track discharges and frail patients who were still in hospital. It resulted in the correct organisation being aware of these patients in order to make sure they were in the best place for their care."

Andy Boocock

Information Analyst,
Luton Children & Adults
Community Health Services

client success

Luton Children & Adults Community Health Services

Using data from A&E attendances, unplanned admissions, hospital discharge (within the last 24 hours) and data on people with severe and moderate frailty, MedeAnalytics helped:

225 Prevented hospital admissions (38/month)

£462K Saved for the local health and care system

58% Of frailty patients had contact (up from 37% the previous year)

The logo for MedeAnalytics, featuring the company name in a white, sans-serif font inside a dark blue, teardrop-shaped graphic.
