

OneResults

OneResults is a unique tool designed to inform users about every blood test needed for a patient based on their medications or conditions. It provides crucial information on whether these tests are up to date or outstanding, how frequently they are needed, and why they are needed.

KEY FEATURES:

OneResults boasts a unique capability not seen in other products on the market: it lets users know which blood tests are needed for a patient, whether they're up to date or not, how often they are needed, and why they are needed.

BENEFITS:

1. **Time-Saving:** By providing comprehensive information readily available, it saves clinicians' time which would otherwise be spent consulting for advice.
2. **Ensures Compliance:** Aligned with MCE guidance, it helps ensure compliance with best practice.
3. **Convenient for Patients:** When taking blood, phlebotomists can ensure they're taking every test that is needed all at the same time - saving the patient from having to come back multiple times.

OneMonitoring

OneMonitoring is a unique tool that allows users to easily identify and manage monitoring requirements for patients based on their medication and conditions. All monitoring needs, including QOF, IIF, medication monitoring, and more can be seen. It displays disease targets and last review dates, smoking status and BMI.

KEY FEATURES:

OneMonitoring offers a distinct feature by consolidating all monitoring requirements into one easily accessible place.

BENEFITS:

1. **Enhanced Coordination of Care:** All members of the GP practice can ensure patients receive the necessary elements of care, optimising patient outcomes.
2. **Improved Efficiency:** More care can be delivered during the initial visit, reducing the need for repeat attendances and enhancing patient satisfaction.
3. **Optimal Long-Term Condition Management:** Helps ensure comprehensive and timely care for patients with long-term conditions.
4. **Achieving Contractual Requirements:** Aids in meeting targets for QOF, IIF, and other contractual obligations, optimising practice income.
