

Maximum freedom for children & families during therapy.

hil Medical
Vestpack

Freedom and safety during therapy

- Approved for use with all types of infusion and nutritional therapies.
- Protects IV lines and infusion equipment.
- Ergonomically distributes weight, making it possible for even smaller children to carry larger fluid volumes.
- Fits everyone from young children to teenagers and adults (sizes 80 to XXL).

HCPs experience that Vestpack creates significant value for patients, families, and healthcare organizations.

- Improved quality of life for patients and families.
- Increased safety and physical activity during treatment.
- Enables home healthcare for all age groups.
- Can contribute to time savings and free up hospital beds.

Elastic front mesh reduces pressure on access sites, keeps the garment secure close to the body, and distributes weight for comfort.

Easily attach any type of fluids and portable pumps. Supports use of two pumps and two fluid bags from size 104.

Dual zippers allow for an optimal fit, even when affected by cortisone treatment

Internal pockets protect IV lines from external exposure.
