

Realize the value of Snowflake Data Cloud faster

Get business-ready data in minutes with Matillion

WIDE ECOSYSTEM

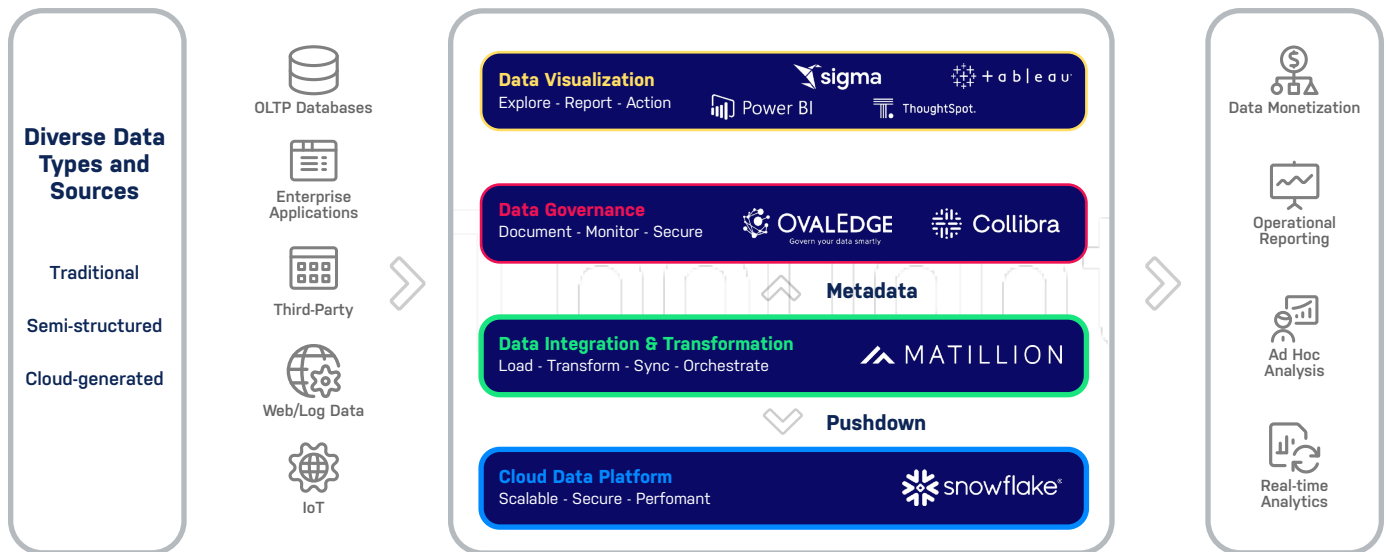

The Modern Enterprise Data Stack is made up of a wide ecosystem of solutions that live in the cloud.

DATA IN THE CLOUD

Data in the cloud comes from more sources and formats, which makes it more difficult to integrate and manage throughout its lifecycle.

MATILLION

Matillion is designed from the ground up to accelerate, automate, and expand the management of data throughout its entire lifecycle.

Get up and running quickly

Integrate all your data from all sources into Snowflake Data Cloud, with massive speed and agility, at scale.

EASY DATA LOADING

Intuitive user interface for batch loading and change data capture (CDC) with ability to leverage existing or create new connectors to virtually any source in minutes, legacy or SaaS, from CDPs to apps.

REALIZE VALUE FAST

Rapidly progress from proof-of-concept to production to ROI.

UTILIZE THE FULL SCALE OF THE CLOUD

Optimized integration and processing on Snowflake to free up time for more valuable work.

LOAD

Collect data from any source with universal data connectors.

TRANSFORM

Cleanse and enrich data to create current, correct, complete datasets for every application.

ORCHESTRATE

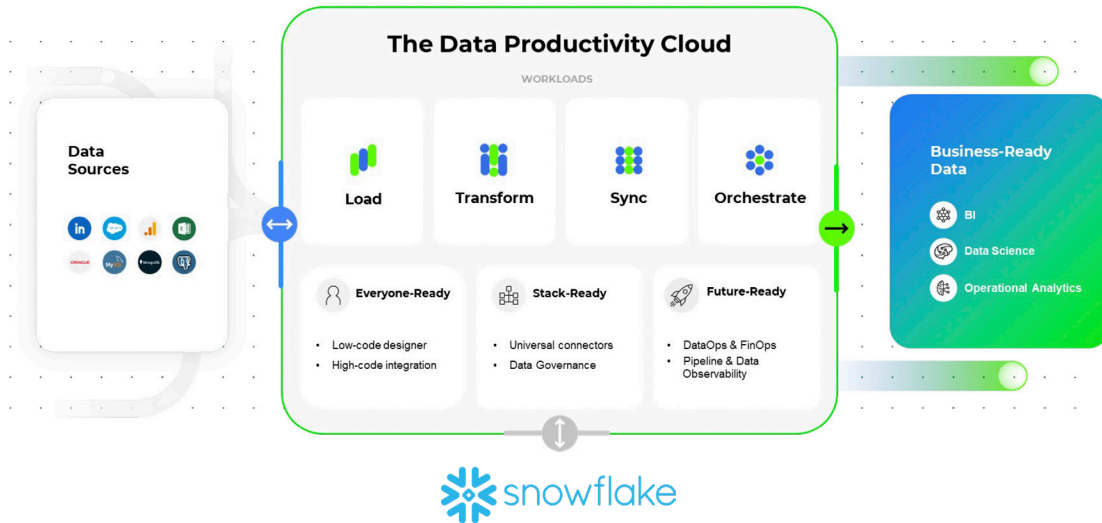

Manage data across its entire lifecycle with consistent metadata regardless of the underlying infrastructure.

SYNC

Push datasets back out across the business for consumption in the core systems of record.

Purpose built for Snowflake

Matillion helps you build out a data and analytics platform that takes full advantage of the speed, performance, and scalability of Snowflake Data Cloud, enabling you to deliver business and analytics-ready data at speed and scale.

SNOWFLAKE SPECIFIC SUPPORT
Zero copy clone, alter warehouse, and more, directly from Matillion, plus maximum performance.

HIGH-END SECURITY CAPABILITIES
Provide advanced deployment options and rights management, leveraging governance.

ORCHESTRATE DATA FLOWS
From ingestion to consumption, with consistent metadata regardless of infrastructure.

Deliver data ready for the business, fast

Get clean, complete data to the business efficiently, ensuring greater consumption and use of data for decisions.

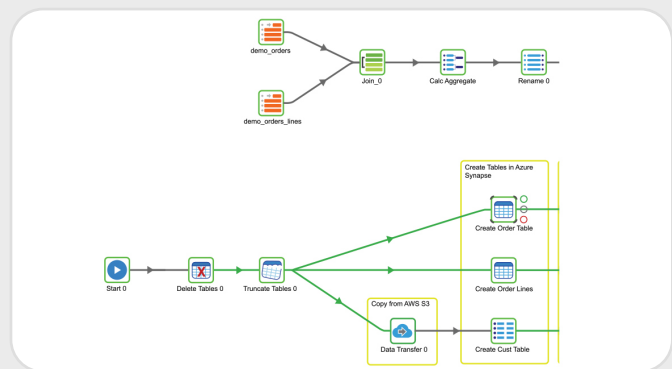

TRANSFORM DATA AT SPEED
Leverage Matillion's low-code/no-code platform for building efficient, high-volume transformations.

EASY TO MANAGE
Schedule, monitor and manage all pipelines in one place.

SAVE MONEY AND SCALE
Train more cost-effective resources, letting data engineers perform higher-value work.

Processed quadrillion rows of data in just **15 mins**

Increased processing speed by **5 x**

Delivered business results in just **2 days**
