HelixHub
By Telstra Health UK

Manage your data **quickly & safely**
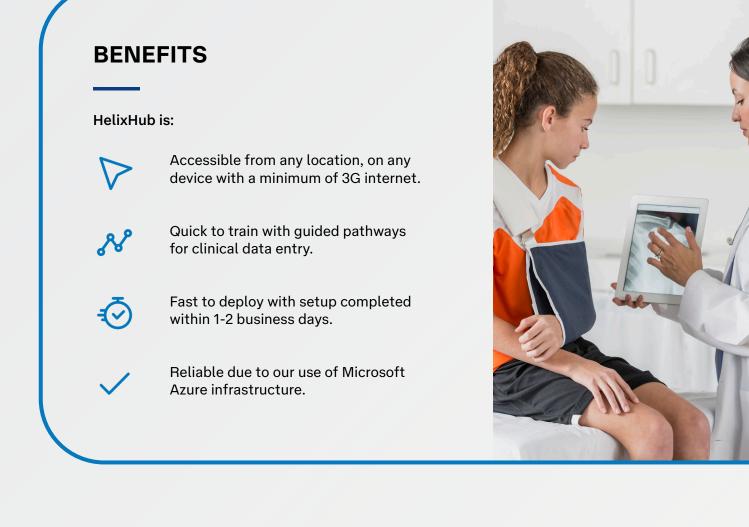

WHAT IT DOES

HelixHub is a browser-based app that allows clinicians to quickly and safely capture the information related to the administration of COVID-19 and Flu vaccines. It allows clinicians, nurses and pharmacists who administer vaccines to streamline their processes and claim funding for activity completed.

WHAT IT DELIVERS

Designed to be used in any care setting on any device, clinicians can:

1. Look-up patient information using the Personal Demographic Service (PDS)

2. Access a patients historic immunisation data via the Immunisation History API

3. Complete a structured clinical assessment

4. Send details of the encounter to the patients GP

5. Record details of the vaccination encounter through our bespoke workflows, as well as allergies & adverse reactions

6. Report on encounters completed

7. Submit claims for fundings to BSA

BENEFITS

HelixHub is:

Accessible from any location, on any device with a minimum of 3G internet.

Quick to train with guided pathways for clinical data entry.

Fast to deploy with setup completed within 1-2 business days.

Reliable due to our use of Microsoft Azure infrastructure.
