Buying Catalogue

Why you should choose eMR+

Our sought-after eMR+ service takes care of the mundane and manual task of managing your medical reports by outsourcing the entire process directly to our team of expert clinicians and administrators.

We provide this service FREE to the NHS with the aim of helping alleviate some of the pressures and challenges, enabling you to focus on other key priorities, such as providing patient care.

Key benefits to GP surgeries:

Created for the NHS to help eliminate some of the pressures faced by GP surgeries

Set-up time can take as little as 10 minutes to set up

Free up valuable time to reallocate workload and focus on patient care

We handle an extensive product mix

You can outsource the entire process to our trusted team if you choose

Reduces queries – no more managing third party and payment chasers

Our team can provide super fast turnaround times on reports

Compatible with your clinical system

Our services have been built already integrated with EMIS, SystmOne and Vision – meaning a more streamlined set-up, as all we have to do is activate our proprietary software eMR within your clinical system, minimising your set-up time to as little as 10 minutes!

Our services are built on the core belief that your medical reporting process can be better managed with ease, in a digital way while helping your surgery embrace digital transformation.

Reduce time, cost and risk with our clinically coded, digital reports, which work intuitively with you and your existing clinical software.

Report types

- ✓ SAR
- ✓ Standard insurance
- ✓ Targeted insurance
- ✓ FME
- ✓ Clinical Trials
- ✓ Occupational health
- ✓ UC113
- ✓ PIP
- ✓ Disability living allowance

- ✓ Health Assessment Advisory Service
- ✓ Legal aid
- ✓ Disability student allowance
- ✓ PHCR
- ✓ CDRM

Wondering how our eMR+ service works?

Register your interest by submitting your details via our online web form.

Once setup, you can start to send us your instructions immediately.

The report is then processed using our clinically coded eMR software.

Each report is reviewed and signed off by our certified in-house team of clinicians.

Completed reports are then sent to requesting parties.

Tried, tested and trusted

To date, we have processed tens of thousands of medical reports on behalf of Primary Care customers across the UK.

We ensure that patients are involved when consent or report approval is required, as well as handle all of the administrative and invoicing tasks.

Medi2data is a team of passionate primary care specialists, medics, data informatics and industry experts, who have come together to create simple, intuitive technologies, which transform how medical data is digitally reported and transacted.

Security & Governance

I found the Medi2data team to be polite and efficient, incredibly well informed, and always highly proactive.

The team have a wealth of knowledge and are always happy to help.

It has been a great pleasure working with the team and I wish eMR Medi2data huge success.
