GHX EXCHANGE SERVICES

For Healthcare Providers

Smarter, faster order management is here

We know that keeping up with the constant flow of purchase orders, order confirmations and invoices between you and your suppliers can be a time-consuming task for busy healthcare providers.

And staying in control of costs, while making sure that orders are correct and the supplies you need arrive in the right place at the right time, is vital to the efficient delivery of your healthcare services.

Now managing your orders is smarter, quicker and easier with GHX Exchange Services – the global e-commerce platform that's changing the way providers and suppliers work together across the healthcare supply chain.

Healthcare transactions made easier

GHX Exchange Services has been designed for faster and more accurate transmission of electronic business documents, including purchase orders, purchase order acknowledgements, advance shipping notices and invoices.

Through the GHX network, we can connect you with more than 400 manufacturers and distributors and give you better visibility of your electronic transactions, for faster, more efficient order processing and greater control of your supply chain.

Uniting the best of healthcare™

Why choose GHX Exchange Services?

Built with the latest GHX technology, GHX Exchange Services offers a host of features and smart functionality to help you automate and optimise your supply chain. Our intuitive, user-friendly platform is designed to connect with your existing ERP system, enabling you to send out purchase orders, formatted to meet your suppliers' requirements, and receive return documents automatically, day in day out.

Access your e-commerce transactions via a **single, user-friendly interface** that integrates with your ERP system.

Get current, and reliable information on your transactions, from order to invoice, with the **real-time dashboard**.

Track an order from start to finish and see the same transactional data your integrated suppliers see, for a more transparent order process and data reconciliation.

Use the **intuitive filter and search functions** to create a more streamlined view, helping you identify issues and flag priorities.

Supports GS1 standards and Peppol-compliant transactions, helping you to meet your **Scan4Safety requirements**.

Receive email notifications on order status, error messages and more, or subscribe to notification types.
